## EXPERIENCE

---

### Physics Dept., Texas State University

Austin, Texas

Software Engineer

June 2021 - August 2021

- Ingested data from disparate sources using a combination of MySQL, Python and React to create data views to be used in Plotly.
- Created Internal Python library used to parse and reformat data from external vendors reducing the error rate in the data pipeline.
- Verified that the data was scientifically valid and acted as the last gate before the data is delivered to the open world

### Traces of Texas

Austin, Texas

Data Engineer Intern

May 2020 - August 2020

- Built Python-based ETL pipeline to extract data on Luigi-scheduled basis, utilizing Scikit-learn, Pandas, and NumPy.
- Deployed scripts using CI/CD Jenkins pipelines.
- Built a logistic regression model to search for target keywords which resulted in 14% increase in post interactions.

### East Side Collective

Austin, Texas

Studio Manager

May 2016 - June 2019

- Implemented deadlines, project goals, expectations and workflows, to ensure a process with on-time delivery.
- Created attractive and effective marketing campaigns for the studio.
- Managed all aspects of the budget for the studio, along with financial tracking and controls.

## SKILLS+

---

**Strong:** Python, C++, Java, MySQL

**Experienced:** JavaScript, React, CSS, AWS, Azure, MS SQL, Mongo DB, Postgre SQL, Apache Nifi, Kafka, Linux, Unix, Git, Jira, Tortoise SVN, Docker, Kubernetes

## WORK

---

### [Visual Question Answering](#) [Python] [PyTorch]

- Multi-modal question answering for open-ended questions that integrate deep residual networks for image feature extraction and bidirectional LSTM for natural language feature extraction.

### [Mobile Rideshare App](#) [Node.js] [PostgreSQL] [Google API] [TypeScript]

- A fullstack rideshare app built with React Native, PostgreSQL, and TypeScript.

### Intelligent Expert System [C++]

- Designed and developed an intelligent expert system which can detect various cancers using forward and backward chaining methodologies with the help of C++

## EDUCATION

---

### Texas State University

San Marcos, Texas

Bachelor of Science, Computer Science

Aug 2019 - Aug 2021

**Relevant Courses:** [Algorithm Analysis and Design] · [Data Mining] · [Database Theory and Design] · [Linear Algebra] · [Data Structures and algorithms] · [Object oriented programming] · [Distributed Systems]
